ABOUT ME

Aca (21) is a curious individual who constantly seeks opportunities to expand her comfort zone and develop her skills. In the IT field, she is most interested in Front-End Web Development and Project Management.

PROFESSIONAL EXPERIENCES

Staffinc Group   Jakarta, Indonesia
IT Project Manager Intern @ Staffinc Suite   May 2025 – Present
- Led a website revamp analysis by conducting User Journey Mapping, Information Architecture planning, and designing wireframes in Figma, to prioritize high-impact features.
- Conducted benchmarking research across 20 competitors, combining qualitative insights and quantitative data to inform product direction.
- Explored potential new features for our core product (SaaS) by reviewing vendor API documentation, ensuring technical feasibility, business value, and user alignment.
- Mapped and refined the business process flowchart, improving product efficiency and cross-functional clarity.

Economic Space   Fully Remote
Web Developer   Aug 2024 – May 2025
- Collaborated in revamping Economic Space's current main website to achieve a user-friendly and functional interface using PHP, HTML, and Tailwind CSS.

PROJECTS

Sistem Informasi PT Salaka Pranata Adicara (SiSPA)   Feb - June 2025
- Developed a web-based information system for PT Salaka Pranata Adicara (PT SPA) to streamline and optimize core enterprise operations.
- Served as Lead System Designer, creating the main brand guideline and designing system-wide wireframes to ensure consistency and usability.
- Engineered core Back-End services using Spring Boot, enabling secure and structured management of invoices, final reports, and cash flow.
- Developed a fully responsive Vue.js interface, integrated with RESTful APIs, to facilitate seamless user interaction and real-time data updates.
- Can be accessed through this link: https://github.com/acasalaka/SiSPA-FE.git

Marmut   Apr - May 2024
- Involved in making an online playlist management system by implementing the concepts of Relational Data Model, Relational DB Constraints, and advanced database functionalities, including Triggers and Stored Procedures.
- Utilized Django Framework and PostgreSQL (using Supabase) for a robust database application.
- Can be accessed through this link: https://github.com/acasalaka/Marmut.git

PathFinder   Feb - Jun 2024
- Participated in creating a Value Proposition Canvas to understand the needs and challenges of high school and college students regarding their education and career choices.
- Conducted user research through interviews and surveys to gather insights later used to shape the app's features and design.
- Assisted in designing wireframes and prototypes using Figma, and conducted Usability Testing to assess user-friendliness and functionality.
- Can be accessed through this link: ristek.link/PortofolioPathFinder

UlasBuku Oct - Dec 2023
- Collaborated in developing an online library and book review management system by implementing a Django template.
- Can be accessed through this link: https://github.com/kelompok-e10/UlasBuku.git

UlasBuku Mobile Oct - Dec 2023
- Participated in creating and deploying a mobile application of UlasBuku using Flutter.
- Can be accessed through this link: https://github.com/kelompok-e10/UlasBuku-Mobile.git

ORGANIZATIONAL EXPERIENCES

Pembinaan Mahasiswa Baru Fakultas Ilmu Komputer Universitas Indonesia 2024 Depok, Indonesia
Ketua Pelaksana Jul 2024 – Nov 2024
- Oversaw and coordinated a major offline orientation program for first-year students, including Welcome to Fasilkom, PSAF, PKOF, Sabtu Ceria, and Momen Keakraban, involving over 700 participants from various faculty elements.
- Led cross-functional collaboration across divisions, ensuring smooth execution and impactful student engagement throughout the 5-month event cycle.

Open House Fakultas Ilmu Komputer Universitas Indonesia 2023 Depok, Indonesia
Project Officer Jul 2023 – Nov 2023
- Directed an offline annual event, which consisted of Tour de Campus, Interactive Class, and Fun Coding, involving more than 222 people from two cohorts, reaching 750+ high school students across Jabodetabek.
- Successfully managed a nationwide webinar involving Microsoft's Azure Technology Specialist to talk about Artificial Intelligence. Attended by over 800 participants from all over Indonesia.

ACTIVITIES

TF LEaRN Scholarship ASEAN Summer @ NTU Program Singapore and Hanoi, Vietnam
Scholarship Awardee Jun 2024 – Jul 2024
- Selected as one of two delegates from Universitas Indonesia to join the ASEAN Summer Program at Nanyang Technological University, alongside students from across Southeast Asia.
- Participated in intensive courses and workshops on Entrepreneurship, Intercultural Competence, and Design & Systems Thinking, collaborating on cross-cultural projects and startup case studies.
